Education

University of Guayaquil

B.Sc. Software Engineering — 9th semester (of 10)

GPA: 9.01 / 10 (grading system: 0–10, minimum passing grade: 7)

Guayaquil, Ecuador

2021 – present

University of Guayaquil — FCMF

Tech Lab: Local Web Server with GNU/Linux (40 hours)

Ubuntu Server on a VM, SSH, UFW, permissions and LAMP stack (Apache, PHP, MariaDB)

Guayaquil, Ecuador

Aug 2026

Google / Coursera

Professional Certificate in Cybersecurity

1 of 4 courses (Foundations completed)

Online

2026 – in progress

Google / Coursera

Professional Certificate in UX Design

2 of 8 courses

Online

2026 – in progress

Hacker Mentor Cybersecurity Academy

Ethical Hacking — Red Team course (8 hours)

Online

2023

Experience

Facilito

Co-founder & Fullstack Developer

Guayaquil, Ecuador

Feb 2026 – present

- Built backend with Django 5 + Django REST Framework + PostgreSQL for a multitenancy SaaS targeting the restaurant industry.
- Integrated AI chat with Claude (Anthropic) and voice transcription with Whisper (OpenAI) to query inventory and record stock movements.
- Developed the mobile app in Flutter + Riverpod + go_router over the REST API with dio, with JWT session and token in secure storage.
- Designed multitenancy at the queryset level: a `for_tenant()` manager that enforces the per-business filter before it reaches the ViewSet.

Freelance

Fullstack Developer

Guayaquil, Ecuador

Jul 2025 – present

- Built the Tia Glenda clinical system (React 19 + MUI + Flask + PostgreSQL, ~130 components) with 3-role RBAC, Swagger and 23 pytest suites — in production.
- Shipped novamicktools.com to production: orders, customers and invoicing (FastAPI + PostgreSQL + Alembic + Cloudinary).
- Implemented a university exam simulator (React + Express + PostgreSQL) with roles, anti-cheating and multi-stage Docker behind nginx.
- Delivered TallerApp (Express + Sequelize + React, 5 Jest/Supertest suites) and an e-commerce integrated with Ecuador's SRI: XML, 49-digit access key and SOAP submission (test environment).

Leveling Area — University of Guayaquil

Software Development Intern

Guayaquil, Ecuador

Feb 2026 (6 months)

- Led frontend, backend, testing, and deployment of the SimuladorPreguntas platform for institutional use.
- Automated internal registration and report-generation workflows using Python scripts.

Projects

RestoVentas

github.com/Mickaell22/restoventas-backend

Restaurant point of sale with voice-driven order taking

NestJS · TypeORM · React Native · Expo

- Backend in NestJS 11 with TypeORM (entities and migrations), Passport-JWT and class-validator; app in React Native 0.86 + Expo 57 with Zustand.
- Voice-driven orders with LLM + STT: the model output is never trusted — it is validated against the real catalog before touching the cart.

MotoVox

github.com/Mickaell22/MotoVox

Motorcycle voice intercom over local WiFi

Flutter · C (NDK ARM64) · FFI · TCP/UDP sockets

- Integrated native C RNNNoise via Dart FFI (NDK build for ARM64) to filter engine and wind noise in real time.
- Solved P2P audio with raw TCP sockets (tcpNoDelay) and peer discovery via UDP broadcast, with no intermediary server.

QR Shield

github.com/Mickaell22/qr-shield

Malicious QR detection engine (anti-quishing) — thesis

Python · FastAPI · pytest

- FastAPI REST API that scores URLs with heuristics (punycode, abuse-prone TLDs, shorteners, literal IPs), with test coverage and an L1–L5 layered design.

ApplyJob

github.com/Mickaell22/ApplyJob

AI-powered automated job application pipeline

Python · Playwright · LLMs

- Aggregated 7 sources (JSON APIs, RSS, HTML) into a common schema, with profile matching, LLM cover letters using prefix caching (~80% fewer tokens) and headless ATS auto-apply via Playwright.

Skills

Backend	Python, Django, DRF, FastAPI, Flask, Node.js, Express, NestJS, C#, Java, PHP
Frontend	React, Next.js, TypeScript, Redux Toolkit, Zustand, Material UI, Tailwind CSS, Vite
Mobile	Flutter, Dart, Riverpod, React Native, Expo
Databases	PostgreSQL, MySQL, SQLite, Firestore · ORMs: SQLAlchemy/Alembic, Prisma, Sequelize, TypeORM
Testing & DevOps	pytest, Jest, Supertest, Vitest, Testing Library, JUnit · Docker (multi-stage, non-root), nginx, GitHub Actions (CI/CD), Railway, Linux, Git
AI & security	Anthropic SDK, OpenAI SDK, Whisper, MCP, RAG (embeddings + ChromaDB) · Kali Linux (active learning), Nmap, Wireshark
Languages	Spanish (native), English (B2 — reading, technical writing, conversational)
