Education

University of Guayaquil

B.Sc. Software Engineering — 9th semester (of 10)

GPA: 8.98 / 10 (grading system: 0–10, minimum passing grade: 7)

Guayaquil, Ecuador

2021 – present

Google / Coursera

Professional Certificate in Cybersecurity

1 of 4 courses (Foundations completed)

Online

2026 – in progress

Google / Coursera

Professional Certificate in UX Design

2 of 8 courses

Online

2026 – in progress

Experience

EcualInventario

Co-founder & Fullstack Developer

- Built backend with Django 5 + Django REST Framework + PostgreSQL for a multitenancy SaaS targeting the restaurant industry.
- Integrated an AI assistant powered by Claude (Anthropic) for inventory queries, order management, and automated reports.
- Developed mobile app with Flutter + Riverpod with real-time sync via Firebase.
- Designed multitenancy architecture with per-tenant data isolation and monthly subscription billing.

Guayaquil, Ecuador

Feb 2026 – present

Freelance

Fullstack Developer

- Built Tia Glenda clinical management system (React + MUI + Python + PostgreSQL, 190+ components) — in production.
- Developed an e-invoicing system integrated with Ecuador's SRI tax authority, running in production at novamicktools.com.
- Implemented university exam simulator (React + FastAPI + PostgreSQL) with role-based access and anti-cheating measures.
- Delivered Taller App: workshop management system (Node.js + React) for a freelance client.

Guayaquil, Ecuador

Jul 2025 – present

Leveling Area — University of Guayaquil

Software Development Intern

- Led frontend, backend, testing, and deployment of the SimuladorPreguntas platform for institutional use.
- Automated internal registration and report-generation workflows using Python scripts.

Guayaquil, Ecuador

Feb 2026 (6 months)

Projects

MotoVox

Voice communication app for motorcycle riders

- Integrated native C code with Flutter via FFI for real-time audio processing with no JVM overhead.
- Implemented peer-to-peer audio streaming via WebRTC without an intermediary server.

github.com/Mickaell22/MotoVox

Flutter · C · WebRTC · FFI

QR Shield

Security tool for QR code analysis

- Built a Chrome extension that intercepts QR scans and queries a Python API to validate URLs for malicious content.
- Developed REST API in Python with domain reputation analysis and phishing detection.

Python · Chrome Extension

ApplyJob

AI-powered automated job application pipeline

github.com/Mickaell22/ApplyJob

Python · Playwright · LLMs

- Automated scraping of 7 job boards, offer matching against candidate profile, and personalized cover letter generation with LLMs.
- Implemented headless ATS auto-apply (Workable, Greenhouse, GetOnBrd) using Playwright.
